

Annex B

Examples of invoices (flow 2) and CDAR life cycle messages for the nominal use case

Version 1.4 of June 30th, 2026

Author: FNFE-MPE, based on the initial work of the DPFE of the DGFIP and the AIFE and in accordance with the work of the AFNOR Electronic Invoicing Standardization Commission, all of its members, and the working group meetings.

VERSION MANAGEMENT

Version No.	Version date	Description of changes
V1.0	2025 07 31	Initial version
V1.2	2025 10 31	PDP modification => PA Correction of several errors in the life cycle examples: • Management dependent on PPF CDVs between PAs: MDT-2, MDT-3 • Presence of MDT-4 (also dependent on PPF/PA CDVs) • Removal of spaces in certain REASONS
V1.3	2026 02 26	New readable version of examples Addition of invoices with sub-lines and multi-vendor invoices
V1.4	2026 06 30	Updated examples Addition of a self-billed invoice which is offset against a “reverse” invoice (the buyer selling back to the seller), and its alternative: a self-billed two-way invoice (bidirectional)

1 General overview

1.1 Presentation of the life cycle exchange circuit and the actors involved

The Electronic Invoicing Reform in France introduces the concept of life cycles, or CDVs, linked to an invoice. These represent all the stages that an invoice goes through during its processing, from issuance to final payment. These stages are called statuses and are intended to ensure complete and synchronized traceability and better visibility of billing flows for the parties involved who transmit them, namely:

- The SELLER is the person who supplies the goods or services covered by an invoice. They are responsible for recording the invoice in their accounts (as revenue or advance payments). When the invoice includes VAT, the SELLER is responsible for collecting it and therefore declaring it as VAT collected (unless they are relying on a TAX REPRESENTATIVE of the SELLER). The SELLER is also often referred to as the Supplier.
- The BUYER is the person who purchased the product or service. They are therefore always the person who records the invoice in their accounts as the buyer (as an expense, inventory, fixed asset, or advance payment). When the invoice includes VAT, the BUYER can deduct it, and it is therefore the BUYER who declares the deductible VAT. In most cases, it is the BUYER who pays the invoice. The BUYER may also be referred to as the Customer.
- Accredited Platforms ("Plateformes Agréées") are therefore the only entities authorized (and registered for this purpose) to exchange invoices falling within the scope of "e-invoicing" scope (domestic B2B invoices between VAT-registered entities in France), and to transmit flows 1, flows 10 (e-reporting) and the so-called "mandatory" statuses to the PPF Data Concentrator.
- The PPF (Public Invoicing Portal) is responsible for the Directory of Single Taxable Entities and their electronic invoicing addresses and for the Data Concentrator (CdD PPF), i.e. for receiving Flow 1, Flow 10 and Flow 6 for Mandatory statuses (Submitted, Rejected, Refused, Received).

It is important to start with the nominal case of a SELLER who invoices their customer, the BUYER, through the AP-E of the invoice issuer (in this case, the SELLER) and the AP-R of the BUYER.

This invoice exchange is accompanied by life cycle statuses, first in a transmission phase (statuses created by the Accredited Platforms for end users to track end-to-end transmission), then in a processing phase where end users can create statuses to be transmitted to their counterparties via the Accredited Platforms.

The transmission statuses (Submitted/Rejected on issue, Issued, Received/Rejected on receipt, Made available) allow the progress of the invoice to be tracked in this order. Processing statuses (Rejected, Disputed, Suspended, Completed, Approved, Partially Approved, Payment Sent, Received) can be set independently. Analysis of use cases may lead to the addition of useful processing statuses for some of them. The first of these is a "Canceled" status to be assigned to an invoice that has been corrected, to indicate that this invoice has been replaced and to close its life cycle.

As a reminder, four of these statuses are "mandatory," meaning they must be sent to the PPF CdD for the tax authorities, namely "Submitted," "Rejected," "Refused," and "Payment Received," which are necessary to prepare the pre-filling of VAT.

Finally, the "Payment Received" status must be sent to the tax authorities only if VAT is due upon receipt (service invoices for which the SELLER has not opted for debits). This also applies to invoices for advance payments on goods for which VAT is payable upon payment of the advance.

It is also possible for the SELLER to transmit the "Payment Received" status even when VAT is not due upon receipt, but in this case, it is only transmitted to the BUYER (and not to the tax authorities via the PPF CdD).

1.2 Building life cycles

Life cycles are triggered by an event (emission, receipt, processing, payment, etc.), according to a sequencing logic.

In the transmission phase, statuses are created by the PA-E or PA-R transmitted in chronological order:

- Issuance, statuses created by the PA-E:
 - ✓ First, a "Submitted" status or a "Rejected" status, the latter being terminal because no other status can follow it. These two statuses are transmitted to the PPF and made available to the Issuer.
 - ✓ Then an "Issued" status (only for the Issuer).

- Receipt, statuses created by AP-R:
 - ✓ Then, on the recipient side, a "Received" status or a "Rejected" status, the latter being final, as no other status can follow it. It MUST also be sent to the PPF.
 - ✓ Finally, a "Made Available" status

The other statuses relate to the processing phase and are always created by the Recipients or Issuer. They can occur at any time and in any order, even if there are steps:

- Accepted or Rejected
- Approved / Partially Approved / Disputed / Suspended then Completed
- Payment Sent / Received.

It may happen that an invoice is first paid (for example, by direct debit), then placed in Dispute, or even Rejected.

The "Rejected" status is final from the PPF's point of view, i.e., it cannot be followed by any other Mandatory status.

The "Received" status must be sent to the PPF for invoices for which VAT is due upon receipt.

The status header indicates who created it, then who issued it, and finally who the recipient(s) is/are. To maintain the confidentiality of Accredited Platforms vis-à-vis third parties, they are not named in the CDVs exchanged between PDDs intended for end users. This is why the Mandatory statuses (Submitted, Rejected, Refused, Received) transmitted to the PPF are different from the same statuses transmitted between Accredited Platforms, as those transmitted to the PPF identify the Accredited Platforms in their header.

The rules for naming actors in the header of CDVs are described in Annex A of standard XP Z12-012 (sheet "CDV Actors").

Life cycles are exchanged through Accredited Platforms, and in particular through the Peppol network for Accredited Platforms that are members. The examples in this annex are in CDAR format, the minimum format described in Standard XP Z12-012. This format allows standardization and use by all actors of these records and consistency of tracking, through time stamping and other standardized data, including technical and fiscal metadata.

It should be noted that there is multiple time stamp data, so this should be explained. A life cycle has several "date and time" entries:

- The status date **(MDT-8)**: corresponds to the date and time when the Life Cycle message was created.
- The status submission date **(MDT-78)**: corresponds to the date and time when the status is created (for example, when a status is set by a user in an application, before the application creates the CDV message that will then be transmitted).
- The subject receipt date **(MDT-95)**: corresponds to the date and time when the invoice was received by the person who set the status.
 - ✓ For statuses set by the Issuer or its AP-E: this is the date and time of the "Submitted" or "Rejected" status at the time of issuance (MDT-8 of these statuses).
 - ✓ For statuses set by the Recipient or its AP-R: this is the date and time of the "Received" or "Rejected" status (MDT-8 of these statuses).
 - ✓ For a given invoice and actor (CDV issuer/recipient), this field will therefore always show the same date and time throughout the life cycle.
- The date of the subject (here the invoice) **(MDT-100)**: corresponds to the date of the invoice (BT-2) to which the CDV relates.

Analysis of use cases shows that it will be necessary to provide additional statuses to support processing, such as "Factored," "Confidentially factored," "Not factored," "Direct payment request," etc.

The examples below already cover the nominal case; the additional statuses will be detailed in examples in the next version.

2 Examples relating to nominal cases

The aim is to provide complete examples of a life cycle in the various nominal cases, namely:

- Issuing an invoice, then processing it until payment: UC1
- Rejection of an invoice: UC2
- Rejection of an invoice: UC3
- Dispute with a corrected invoice: UC4
- Dispute with credit note and new invoice: UC5

For each use case, examples of invoices in the three minimum standard formats (XP Z12-012) are provided, along with examples of all life cycle status messages (CDAR), organized by directory, with the file names listed in the various chapters below.

2.1 Reminder: Transmission of an invoice and life cycle

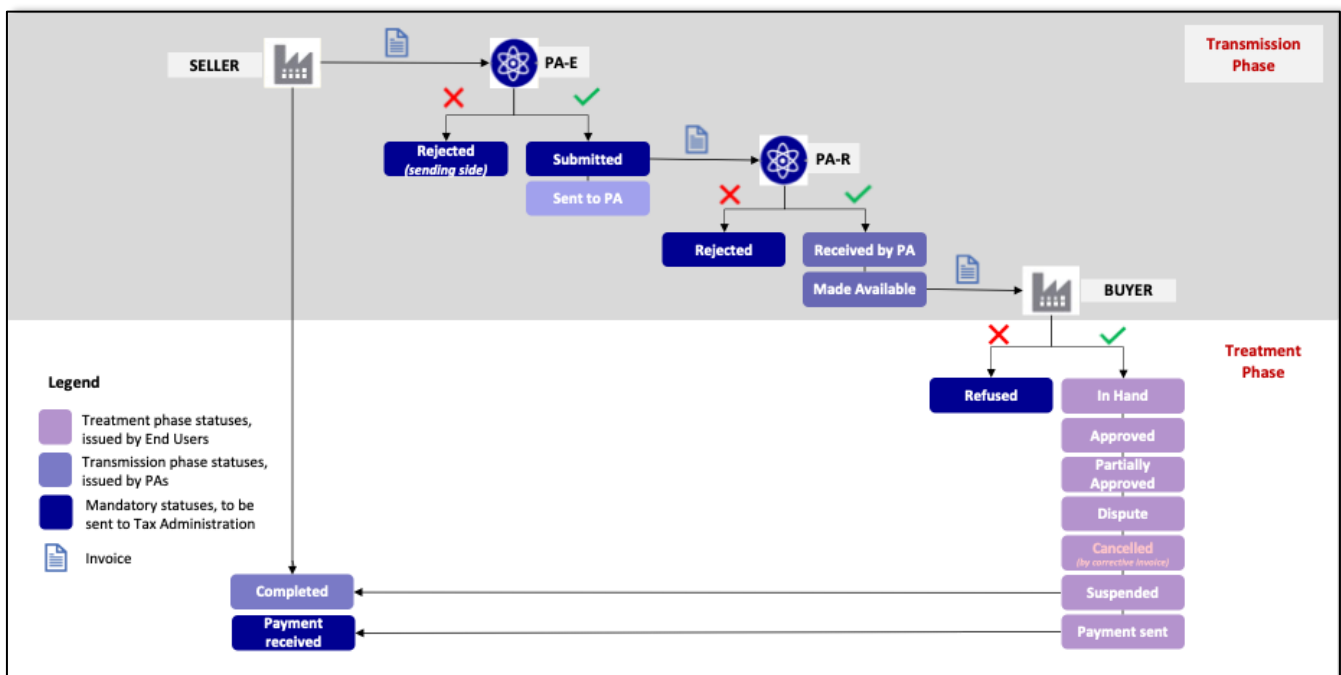

Figure1 : Illustration of the life cycle and different statuses

2.2 Nominal case: Issuing an invoice and life cycle until payment

The main data in the invoice is as follows:

Characteristic	Filling
Invoice file names (3 formats)	Invoice-X: UC1_F202500003_00-INV_20250701.pdf CII: UC1_F202500003_00-INV_20250701_CII.xml UBL: UC1_F202500003_00-INV_20250701_UBL.xml
Invoice ID	F202500003
Date	07/01/2025
Type	E-invoicing invoice (type code: 380)
Seller's name	THE SELLER
Legal ID of the Seller	100000009

Characteristic	Filling
Seller's electronic address (schemeId 0225)	100000009_STATUS
Buyer's name	THE CUSTOMER
Buyer's legal ID	20000000
Buyer's electronic address (schemeId 0225)	2000
Number of lines	2
VAT rate (%)	2
Unit price line 1 (€)	40
Unit for P.U. line 1	HOUR
Quantity line 1	2
Unit price line 2 (€)	4
Unit for P.U. line 2	DAY
Quantity line 2	5
Total line 1 without VAT (€)	8
Total without VAT line 2 (€)	2
Total document without VAT (€)	10,000
Total VAT (€)	2,000
Total document with VAT (€)	12,000

The life cycle sequence is as follows:

Step	DATE	Time	Event
UC1_00	07/01	15:	The SELLER sends its invoice to the Seller's AP-E.
UC1_01	01	15:	AP-E performs checks and sets status to Submitted
	07/01/2025	3:15	AP-E creates the "Submitted" CDV. Status available to THE SELLER. Transmission to the PPF within 24 hours.
	07/01	16	AP-E transmits the invoice (flow 2) to AP-R
UC1_02	0	16:10	AP-R performs checks and sets status to Received
	07/01/2025	16:	AP-R creates CDV Received for the SELLER and sends it to AP-E. Status made available to the BUYER.
	01	16	AP-R sends the invoice to the BUYER or notifies them of its availability.
UC1_03	0	16:	AP-R sets MAD (Availability) status for the BUYER
	07/01/2025	16:30	AP-R creates MAD CDV for the SELLER and sends it to AP-E. Status made available to the BUYER.
	07/01	16	AP-E makes MAD status available to the SELLER.
UC1_04	0	18	The BUYER sets a PEC (Acceptance) status.

	07/01/2025	18	AP-R (or BUYER) sets the PEC status and sends it to the SELLER via their AP-E
	07/01	18	AP-E makes the PEC status available to the SELLER.
UC1_05	02	10	The BUYER sets the status to "Approved."
	02	10:05	AP-R (or BUYER) sets the status to Approved and sends it to VE via its AP-E
	07/02	10:10	AP-E makes the Approved status available to the SELLER.
UC1_06	07/30	10:	BUYER sets the status Payment sent
	30	10:05	AP-R (or BUYER) sets the status to Payment transmitted and sends it to VE via its AP-E.
	07/30/2025	10:10	AP-E makes the Payment transmitted status available to the SELLER.
UC1_07	02/08	10:00	SELLER sets status to "Received"
	02	10:05	AP-E (or VE) sets the status to "Received" and sends it to the BUYER via their AP-R Transmission to the PPF.
	08/02	10:10	AP-R makes the "Received" status available to the BUYER.

The files for the different life cycle statuses are as follows (and contain comments to identify the MDT-XXX data codes):

Status	XML file name
Submitted	UC1_F202500003_01-CDV-200_Depose
	UC1_F202500003_01-CDV-200_Deposee_POUR_PPF
Received	UC1_F202500003_02-CDV-202_Recue
Made available	UC1_F202500003_03-CDV-203_Mise_a_disposition
Taken	UC1_F202500003_04-CDV-204_Prise_en_charge
Approved	UC1_F202500003_05-CDV-205_Approuvee
Payment sent	UC1_F202500003_06-CDV-211_Paiement_transmis 12,000 € on 07/30/2025
Payment Received	UC1_F202500003_07-CDV-212_Encaissee
	UC1_F202500003_07-CDV-212_Encaissee_POUR_PPF

2.3 Rejected upon receipt

The main details of the invoice are as follows:

Characteristic	Filling
Invoice file names (3 formats)	Invoice: UC2_F202500004_00-INV_20250701.pdf CII: UC2_F202500004_00-INV_20250701_CII.xml UBL: UC2_F202500004_00-INV_20250701_UBL.xml
Invoice ID	F202500004
Date	07/01/2025
Type	E-invoicing invoice (type code: 380)
Seller	THE SELLER
Legal ID of the Seller	100000009
Seller's electronic address (schemeId 0225)	100000009_STATUS
Buyer's name	THE CUSTOMER
Buyer's legal ID	200000000
Buyer's electronic address (schemeId 0225)	2000
Number of lines	2
VAT rate (%)	2
Unit price line 1 (€)	40
Unit for P.U. line 1	HOUR
Quantity line 1	2
Unit price line 2 (€)	4
Unit for P.U. line 2	DAY
Quantity line 2	5
Total line 1 without VAT (€)	8
Total without VAT line 2 (€)	2
Total document without VAT (€)	10,000
Total VAT (€)	2,000
Total document with VAT (€)	12,000

The life cycle sequence is as follows:

Step	DATE	Time	Event
UC2_00	07/01/2025	15	The SELLER sends their invoice to the Seller's AP-E.
UC2_01	01	15:	AP-E performs checks and sets status to Submitted
	07/01/2025	15	AP-E creates CDV Submitted. Status available to the SELLER. Transmission to PPF within 24 hours.
	07/01	16	AP-E transmits the invoice (flow 2) to AP-R

UC2_02	0	16:10	AP-R performs checks and sets status to Rejected
	07/01/2025	16	AP-R creates a "Rejected" CDV for the SELLER and sends it to AP-E and the PPF. Status made available to the BUYER.
	07/01	16	AP-E makes the status "Rejected" available to the SELLER.

The files for the different life cycle statuses are as follows (and contain comments to identify the MDT-XXX data codes):

Status	XML file name
Submitted	UC2_F202500004_01-CDV-200_Deposee UC2_F202500004_01-CDV-200_Deposee_POUR_PPF
Rejected	UC2_F202500004_02-CDV-213_Rejetee UC2_F202500004_02-CDV-213_Rejetee_POUR_PPF REASON: DUPLICATE (Duplicate invoice (already issued/received) - Identical invoice received at another address

2.4 Rejected

The main details of the invoice are as follows:

Characteristic	Field
Invoice file names (3 formats)	Factur-X: UC3_F202500005_00-INV_20250701.pdf CII: UC3_F202500005_00-INV_20250701_CII.xml UBL: UC3_F202500005_00-INV_20250701_UBL.xml
Invoice ID	F202500005
Date	07/01/2025
Type	E-invoicing invoice (typecode: 380)
Seller's name	THE SELLER
Legal ID of the Seller	100000009
Seller's electronic address (schemeId 0225)	100000009_STATUS
Buyer's name	THE CUSTOMER
Buyer's legal ID	20000000
Buyer's electronic address (schemeId 0225)	2000
Number of lines	2
VAT rate (%)	1
Unit price line 1 (€)	40
Unit for P.U. line 1	HOUR
Quantity line 1	2
Unit price line 2 (€)	4

Characteristic	Field
Unit for P.U. line 2	DAY
Quantity line 2	5
Total line 1 without VAT (€)	8
Total without VAT line 2 (€)	2
Total document without VAT (€)	10,000
Total VAT (€)	1,000
Total document with VAT (€)	11,000

The life cycle sequence is as follows:

Step	DATE	Time	Event
UC3_00	07/01	15:	The SELLER sends their invoice to the Seller's AP-E.
UC3_01	07/01	15:	AP-E performs checks and sets status to Submitted
	07/01/2025	3:15	AP-E creates CDV Submitted. Status available for VE. Transmission to PPF within 24 hours.
	07/01	16	AP-E sends the invoice (flow 2) to AP-R
UC3_02	0	16:10	AP-R performs checks and sets status to Received
	07/01	16:	AP-R creates CDV Received for the SELLER and sends it to AP-E. Status made available to the BUYER.
	01	16	AP-R sends the invoice to ACH or notifies them of its availability.
UC3_03	0	16:	AP-R sets MAD (Made Available) status for ACH
	07/01/2025	16	AP-R Creates MAD CDV for the SELLER and sends it to AP-E. Status made available to the BUYER
	07/01/2025	16:40	AP-E makes the MAD status available to the SELLER.
UC3_04	0	18	ACH sets status to "Rejected" (incorrect VAT rate)
	07/01	18	AP-R Creates a "Rejected" CDV for THE SELLER and sends it to AP-E and PPF. REASON: TX_TVA_ERR (Incorrect VAT rate)
	07/01	18	PAP-E sets the status to "Rejected" for the SELLER

The files for the different life cycle statuses are as follows (and contain comments to identify the MDT-XXX data codes):

Status	XML file name
Submitted	UC3_F202500005_01-CDV-200_Deposee UC3_F202500005_01-CDV-200_Deposee_POUR_PPF

Status	XML file name
Received	UC3_F202500005_02-CDV-202_Recue
Made available	UC3_F202500005_03-CDV-203_Mise_a_disposition
Rejected	UC3_F202500005_04-CDV-210_Refusee UC3_F202500005_04-CDV-210_Refusee_POUR_PPF REASON: Incorrect VAT rate

2.5 Dispute with corrected invoice

2.5.1 Disputed invoice and status

The main details of the invoice are as follows:

Characteristic	Field
Invoice file names (3 formats)	Invoice-X: UC4_F202500006_00-INV_20250701.pdf CII: UC4_F202500006_00-INV_20250701_CII.xml UBL: UC4_F202500006_00-INV_20250701_UBL.xml
Invoice ID	F202500006
Date	07/01/2025
Type	E-invoicing invoice (typecode: 380)
Seller	THE SELLER
Legal ID of the Seller	100000009
Seller's electronic address (schemeId 0225)	100000009_STATUS
Buyer's name	THE CUSTOMER
Buyer's legal ID	20000000
Buyer's electronic address (schemeId 0225)	2000
Number of lines	2
VAT rate (%)	1
Unit price line 1 (€)	40.00
Unit for P.U. line 1	HOUR
Quantity line 1	2
Unit price line 2 (€)	4
Unit for P.U. line 2	DAY
Quantity line 2	5
Total line 1 without VAT (€)	8
Total without VAT line 2 (€)	2
Total document without VAT (€)	10,000
Total VAT (€)	1,000
Total document with VAT (€)	11,000

The life cycle sequence is as follows:

Step	DATE	Time	Event
UC4_00	07/01	15	The SELLER sends its invoice to the Seller's AP-E.
UC4_01	07/01	15:10	AP-E performs checks and sets status to Submitted
	07/01/2025	15	AP-E creates CDV Submitted. Status available to the SELLER. Transmission to PPF within 24 hours.
	07/01	16	AP-E sends the invoice (flow 2) to AP-R
UC4_02	01	16:10	AP-R performs checks and sets status to Received
	07/01/2025	16:	AP-R creates CDV Received for the SELLER and sends it to AP-E. Status made available to the BUYER.
	01	16	AP-R sends the invoice to ACH or notifies them of its availability.
UC4_03	01	16:	AP-R sets MAD (Made Available) status for ACH
	07/01/2025	16	AP-R creates MAD CDV for the SELLER and sends it to AP-E. Status made available to the BUYER.
	01	16	AP-E makes MAD status available to the SELLER.
UC4_04	0	18	The BUYER sets the status to Disputed (incorrect VAT rate)
	07/01	18	AP-R Creates a "Disputed" CDV for the SELLER and sends it to AP-E and PPF. REASON: TX_VAT_ERR (incorrect VAT rate)
	07/01	18:20	PAP-E sets the status to "In Dispute" for the SELLER.
UC4b_05	07/02	16:05	Once the corrected invoice has been sent, the SELLER sets the status of the original invoice to "Canceled."
	02	16:	AP-E creates a "Canceled" CDV for the SELLER and sends it to AP-R. Status made available to the SELLER.
	07/02		AP-R makes the status "Canceled" available to the BUYER.

The files for the different life cycle statuses are as follows (and contain comments to identify the MDT-XXX data codes):

Status	XML file name
Submitted	UC4_F202500006_01-CDV-200_Deposee UC4_F202500006_01-CDV-200_Deposee_POUR_PPF
Received	UC4_F202500006_02-CDV-202_Recue
Made available	UC4_F202500006_03-CDV-203_Mise_a_disposition

Status	XML file name
In dispute	UC4_F202500006_04-CDV-207_En_litige REASON: Incorrect VAT rate
Once the corrected invoice has been sent: Canceled	UC4b_F202500006_05-CDV-220_Annuleee.xml Issued by the SELLER to terminate the life cycle of this invoice replaced by the corrected invoice

2.5.2 Corrected invoice and statuses

The main data in the invoice is as follows:

Characteristic	Filling
Invoice file names (3 formats)	Invoice-X: UC4b_F202500010_00-INVCORR_20250702.pdf CII: UC4b_F202500010_00-INVCORR_20250702_CII.xml UBL: UC4b_F202500010_00-INVCORR_20250702_UBL.xml
Invoice ID	F202500010
Date	07/02/2025
Type	Corrected invoice (type code: 384)
Seller	THE SELLER
Legal ID of the Seller	100000009
Seller's electronic address (schemeId 0225)	100000009_STATUS
Buyer's name	THE CUSTOMER
Legal ID of the Buyer	200000008
Buyer's electronic address (schemeId 0225)	200000008
Number of lines	2
VAT rate (%)	2
Unit price line 1 (€)	40
Unit for P.U. line 1	HOURL
Quantity line 1	2
Unit price line 2 (€)	4
Unit for P.U. line 2	DAY
Quantity line 2	5
Total line 1 without VAT (€)	8
Total without VAT line 2 (€)	2
Total document without VAT (€)	10,000
Total VAT (€)	2,000
Total document with VAT (€)	12,000

The life cycle sequence is as follows:

Step	DATE	Time	Event
UC4b_00	07/02	15:	The SELLER sends their invoice to the Seller's AP-E.
UC4b_01	07/02	15:10	AP-E performs checks and sets status to Submitted
	07/02/2025	15	AP-E creates the "Submitted" CDV. Status available to THE SELLER. Transmission to the PPF within 24 hours.
	07/02	16	AP-E transmits the invoice (flow 2) to AP-R
UC4b_02	02	16:10	AP-R performs checks and sets status to Received
	07/02	16	AP-R Creates CDV Received for the SELLER and sends it to AP-E. Status made available to the BUYER.
	07/02	16	AP-R sends the invoice to the BUYER or notifies them of its availability.
UC4b_03	02	16:25	AP-R sets MAD (Made Available) status for the BUYER
	02	4:30 p.m.	AP-R Creates MAD CDV for the SELLER and sends it to AP-E. Status made available to the BUYER
	07/02	16:40	AP-E makes MAD status available to the SELLER.
UC4b_04	02	18	The BUYER sets a PEC (Acceptance) status.
	07/02	18	AP-R (or BUYER) creates the PEC status and sends it to the SELLER via their AP-E
	07/02	18	AP-E makes the PEC status available to the SELLER.
UC4b_05	03	10:00	The BUYER sets the status to "Approved"
	07/03	10:05	AP-R (or BUYER) sets the status to Approved and sends it to VE via its AP-E
	07/03	10:10	AP-E makes the Approved status available to the SELLER.
UC4b_06	07/30	10:	BUYER sets the status Payment sent
	30	10:05	AP-R (or BUYER) sets the status to Payment transmitted and sends it to VE via its AP-E.
	07/30/2025	10:10	AP-E makes the Payment transmitted status available to the SELLER.
UC4b_07	02	10:00	SELLER sets status to "Received"
	02	10:05	AP-E (or VE) sets the status to "Received" and sends it to the BUYER via their AP-R Transmission to the PPF.
	08/02	10:10	AP-R provides the status "Paid" to the BUYER.

2.6 Dispute with credit note and re-invoicing

2.6.1 Disputed original invoice and statuses

The main details of the invoice are as follows:

Characteristic	Filling
Invoice file names (3 formats)	Invoice-X: UC5_F202500007_00-INV_20250702.pdf CII: UC5_F202500007_00-INV_20250702_CII.xml UBL: UC5_F202500007_00-INV_20250702_UBL.xml
Invoice ID	F202500007
Date	07/02/2025
Type	E-invoicing invoice (type code: 380)
Seller's name	THE SELLER
Legal ID of the Seller	100000009
Seller's electronic address (schemeId 0225)	100000009_STATUS
Buyer's name	THE CUSTOMER
Buyer's legal ID	20000000
Buyer's electronic address (schemeId 0225)	2000
Number of lines	2
VAT rate (%)	1
Unit price line 1 (€)	40
Unit for P.U. line 1	HOURL
Quantity line 1	2
Unit price line 2 (€)	4
Unit for P.U. line 2	DAY

Characteristic	Filling
Quantity line 2	5
Total line 1 without VAT (€)	8
Total without VAT line 2 (€)	2,000
Total document without VAT (€)	10,000
Total VAT (€)	1,000
Total document with VAT (€)	11,000

The life cycle sequence is as follows:

Step	DATE	Time	Event
UC5_00	07/02	16	The SELLER sends their invoice to the Seller's AP-E.
UC5_01	02	16	AP-E performs checks and sets status to Submitted
	02	16	AP-E creates CDV Submitted. Status available for VE. Transmission to PPF within 24 hours.
	07/02	17	AP-E sends the invoice (flow 2) to AP-R.
UC5_02	02	17:10	AP-R performs checks and sets status to Received
	07/02	17	AP-R creates CDV Received for the SELLER and sends it to AP-E. Status made available to the BUYER.
	02	17	AP-R sends the invoice to ACH or notifies them of its availability.
UC5_03	02	17:	AP-R sets MAD (Made Available) status for ACH
	07/02/2025	17:	AP-R creates MAD CDV for the SELLER and sends it to AP-E. Status made available to the BUYER.
	07/02	17	AP-E makes the MAD status available to the SELLER.
UC5_04	02	18	The BUYER sets the status to Disputed (incorrect VAT rate)
	07/02/2025	18:15	AP-R Creates a "Disputed" CDV for THE SELLER and sends it to AP-E and PPF. REASON: TX_TVA_ERR (Incorrect VAT rate)
	07/02	18	PAP-E sets the status to "In Dispute" for the SELLER.
UC5b_05	07/04	10:00	The BUYER sets the status of the INVOICE to "Approved" at the same time as setting the status of the CREDIT NOTE to "Approved."
	07/04/2025	10:05	AP-R (or the BUYER) sets the status to Approved and sends it to the SELLER via their AP-E.
	07/04/2025	10:10	AP-E makes the Approved status available to the SELLER.
UC5b_07	0	11:00	The SELLER sets the status "Paid" on the INVOICE, at the same time as the status "Paid" on the CREDIT NOTE.

	07/04	11:05	AP-E (or the SELLER) sets the status to Paid and sends it to the BUYER via their AP-R. Transmission to the PPF.
	07/04	11:10	AP-R makes the status "Received" available to the BUYER.

The files for the different life cycle statuses are as follows (and contain comments to identify the MDT-XXX data codes):

Status	XML file name
Submitted	UC5_F202500007_01-CDV-200_Deposee UC5_F202500007_01-CDV-200_Deposee_POUR_PPF
Received	UC5_F202500006_02-CDV-202_Recue
Made available	UC5_F202500006_03-CDV-203_Mise_a_disposition
In dispute	UC5_F202500007_04-CDV-207_En_litige REASON: Incorrect VAT rate
Approved, at the same time as for the CREDIT	UC5b_F202500007_05-CDV-205_Approuveee.xml
Payment Received, at the same time as the CREDIT	UC5b_F202500007_07-CDV-212_Encaisseee.xml

2.6.2 CREDIT on initial invoice and statuses

The main data in the invoice is as follows:

Characteristic	Filling
Invoice file names (3 formats)	Factur-X: UC5b_F202500011_00-CN_20250703.pdf CII: UC5b_F202500011_00-CN_20250703_CII.xml UBL: UC5b_F202500011_00-CN_20250703_UBL.xml
Invoice ID	F202500011
Date	07/03/2025
Type	Credit note (typecode: 381)
Seller	THE SELLER
Legal ID of the Seller	10000000
Seller's electronic address (schemeId 0225)	100000009_STATUS
Buyer's name	THE CUSTOMER
Buyer's legal ID	20000000
Buyer's electronic address (schemeId 0225)	2000
Number of lines	2
VAT rate (%)	1
Unit price line 1 (€)	40
Unit for P.U. line 1	HOURL
Quantity line 1	2

Characteristic	Filling
Unit price line 2 (€)	4
Unit for P.U. line 2	DAY
Quantity line 2	5
Total line 1 without VAT (€)	8
Total without VAT line 2 (€)	2
Total document without VAT (€)	10,000
Total VAT (€)	1,000
Total document with VAT (€)	11,000

The life cycle sequence is as follows:

Step	DATE	Time	Event
UC5b_00	07/03	3:00	The SELLER sends their Credit Note to the Seller's AP-E
UC5b_01	03	15	AP-E performs checks and sets status to Submitted
	03	15	AP-E creates the "Submitted" CDV. Status available to THE SELLER. Transmission to the PPF within 24 hours.
	07/03	16	AP-E transmits the invoice (flow 2) to AP-R
UC5b_02	03	16:10	AP-R performs checks and sets status to Received
	07/03/2025	16:	AP-R Creates CDV Received for the SELLER and sends it to AP-E. Status made available to the BUYER
	07/03/2025	16:20	AP-R sends the invoice to the BUYER or notifies them that it is available
UC5b_03	07/03	16:	AP-R sets MAD (Made Available) status for the BUYER
	03	16	AP-R creates MAD CDV for the SELLER and sends it to AP-E. Status made available to the BUYER.
	07/03	16	AP-E makes the MAD status available to the SELLER.
UC5b_04	03	18	The BUYER sets a PEC (Acceptance) status.
	07/03	18:10	AP-R (or BUYER) creates the PEC status and sends it to the SELLER via their AP-E
	07/03	18	AP-E makes the PEC status available to the SELLER.
UC5b_05	0	10:00	The BUYER sets the status to "Approved" for the CREDIT NOTE at the same time as setting the status to "Approved" for the original invoice.
	07/04	10:05	AP-R (or BUYER) sets the status to Approved and sends it to VE via its AP-E
	07/04	10:10	AP-E makes the Approved status available to the SELLER.

UC5b_06	0	11:00	SELLER assigns a negative "Received" status to the CREDIT NOTE at the same time as a positive "Received" status to the original invoice.
	07/04	11	AP-E (or VE) constitutes the Received status and transmits it to the BUYER via its AP-R Transmission to the PPF.
	07/04/2025	11:10	AP-R makes the "Received" status available to the BUYER.

The files for the different life cycle statuses are as follows (and contain comments to identify the MDT-XXX data codes):

Status	XML file name
Submitted	UC5b_F202500011_01-CDV-200_Deposee UC5b_F202500011_01-CDV-200_Deposee_POUR_PPF

2.6.3 New invoice (re-invoicing) and statuses

The main data in the invoice is as follows:

Characteristic	Filling
Invoice file names (3 formats)	Invoice-X: UC5c_F202500012_00-INV_20250705.pdf CII: UC5c_F202500012_00-INV_20250705_CII.xml UBL: UC5c_F202500012_00-INV_20250705_UBL.xml
Invoice ID	F202500012
Date	07/05/2025
Type	E-invoicing invoice (typecode: 380)
Seller	THE SELLER
Legal ID of the Seller	100000009
Seller's electronic address (schemeId 0225)	100000009_STATUS
Buyer's name	THE CUSTOMER
Buyer's legal ID	200000000
Buyer's electronic address (schemeId 0225)	2000
Number of lines	2
VAT rate (%)	2

Characteristic	Filling
Unit price line 1 (€)	40
Unit for P.U. line 1	HOUR
Quantity line 1	2
Unit price line 2 (€)	4
Unit for P.U. line 2	DAY
Quantity line 2	5
Total line 1 without VAT (€)	8,000
Total without VAT line 2 (€)	2,000
Total document without VAT (€)	10,000
Total VAT (€)	2,000
Total document with VAT (€)	12,000

The life cycle sequence is as follows:

Step	DATE	Time	Event
UC5c_00	07/05/2025	15:	The SELLER sends its invoice to the Seller's AP-E.
UC5c_01	07/05	15	AP-E performs checks and sets status to Submitted
	07/05/2025	15:	AP-E creates the "Submitted" CDV. Status available to THE SELLER. Transmission to the PPF within 24 hours.
	07/05	16	AP-E transmits the invoice (flow 2) to AP-R
UC5c 02	0	16:10	AP-R performs checks and sets status to Received
	07/05/2025	16	AP-R creates CDV Received for the SELLER and sends it to AP-E. Status made available to the BUYER.
	07/05	16	AP-R sends the invoice to the BUYER or notifies them that it is available.
UC5c 03	05	16:25	AP-R sets MAD (Made Available) status for the BUYER
	05	16	AP-R creates MAD CDV for the SELLER and sends it to AP-E. Status made available to the BUYER.
	07/05	16	AP-E makes MAD status available to the SELLER.
UC5c 04	0	18	The BUYER sets a PEC (Prise en Charge) status
	07/05/2025	18:10	AP-R (or BUYER) creates the PEC status and sends it to the SELLER via their AP-E
	07/05	18	AP-E makes the PEC status available to the SELLER.
UC5c 05	0	10	The BUYER sets the status to "Approved"
	07/06	10:05	AP-R (or BUYER) sets the status to Approved and sends it to VE via their AP-E

Step	DATE	Time	Event
	07/06	10:10	AP-E makes the Approved status available to the SELLER.
UC5c 06	07/30	10:	BUYER sets the status Payment sent
	07/30/2025	10:05	AP-R (or BUYER) sets the status to Payment transmitted and sends it to VE via its AP-E.
	07/30/2025	10:10	AP-E makes the Payment transmitted status available to the SELLER.
UC5c 07	02	10:00	SELLER sets status to "Received"
	02	10:05	AP-E (or VE) sets the status to "Received" and sends it to the BUYER via their AP-R Transmission to the PPF.
	08/02	10:10	AP-R makes the status "Received" available to the BUYER.

The files for the different life cycle statuses are as follows (and contain comments to identify the MDT-XXX data codes):

Status	XML file name
Submitted	UC5c_F202500012_01-CDV-200_Deposee UC5c_F202500012_01-CDV-200_Deposee_POUR_PPF
Received	UC5c_F202500012_02-CDV-202_Recue
Made available	UC5c_F202500012_03-CDV-203_Mise_a_disposition
Accepted	UC5c_F202500012_04-CDV-204_Prise_en_charge
